That Stupid Machine is Alarming Again:  
Transitioning Hospital Technology into the Home  

Thursday, December 11, 2014  
1:00-2:00 pm Eastern

The AAMI Foundation’s Healthcare Technology Safety Institute is pleased to offer a new webinar on home healthcare. The delivery of healthcare in nontraditional settings is increasing rapidly as the population ages, people live longer with serious medical conditions, and hospitals strive to cut costs. Patients often prefer receiving care in the comfort of their own homes; however, placing complex medical equipment in the home can be extraordinarily difficult. Join this webinar to hear from Pediatric Home about how they are successfully managing the pediatric home medical equipment to enable pediatric patients to live safely and successfully at home. This webinar will focus on:

A. The benefits of biomedical personnel and the process of equipment maintenance, troubleshooting, and repair  
B. How PHS develops its home care plan and trains caregivers to focus on home device medical management.

Attendees will also receive examples of tools created to advise caregivers when things go wrong with patients or their medical devices.

To register for this webinar, click here: https://attendee.gotowebinar.com/register/6933834047975734017

Speakers

- **Judy Giel**, AAS, RRT, Chief Clinical Officer, Pediatric Home Service  
- **Roy Maynard, MD**, Medical Director, Pediatric Home Service

Who Should Attend?

The topics presented will benefit hospital clinicians, medical device manufacturers, home caregivers, and anyone that is involved in the discharge of a patient requiring sophisticated medical devices.

About Pediatric Home Service (PHS)

Based in St. Paul, Minn., Pediatric Home Service is an independent pediatric home care company that helps children with medical complexities and technology dependencies live safely and successfully where they're most comfortable, at home with their families, rather than in a hospital. Pediatric Home Service has been partnering with health care professionals and family caregivers for more than two decades to deliver compassionate, specialized, high-quality care to children with special medical needs.
