AAMI Standards Insider

We appreciate everyone who joined us for the AAMI Standards Insider webinar, hosted on 28 September 2023, 1:30pm (EST). The **one-hour FREE webinar** provides news and updates about AAMI's standards program and portfolio. Registration for the upcoming webinars and recordings of past webinars in the series is available on the [webpage](#).

AAMI/ISO 13408-1:202X, Aseptic processing of health care products — Part 1: General requirements. (proposed identical national adoption of ISO 13408-1:2023) This document specifies the general requirements for, and offers guidance on, processes, programs and procedures for development, validation and routine control of aseptic processing of health care products. This document includes requirements and guidance relative to the overall topic of aseptic processing. Contact: [Mike Miskell](#)

AAMI/ISO 11137-2, Sterilization of health care products—Radiation—Part 2: Establishing the sterilization dose. (reaffirmation of an American National Standard) This document specifies methods for determining the minimum dose needed to achieve a specified requirement for sterility and methods to substantiate the use of 25 kGy or 15 kGy as the sterilization dose to achieve a sterility assurance level, SAL, of 10⁻⁶. This document also specifies methods of sterilization dose audit used to demonstrate the continued effectiveness of the sterilization dose. This document defines product families for sterilization dose establishment and sterilization dose audit. Contact: [Mike Miskell](#)

AAMI/ISO 11137-2:2013/Amd 1:202X, Sterilization of health care products—Radiation—Part 2: Establishing the sterilization dose—Amendment 1. (proposed identical national adoption of ISO 11137-2:2013/Amd 1: 2022) This amendment adds new normative references, adds a subclause to clause 6 Methods of dose establishment, updates clause 9 title, updates subclause 9.1 title and text. AAMI/ISO 11138-4, Sterilization of health care products-Biological indicators-Part 4: Biological indicators for dry heat sterilization processes. (reaffirmation of an American National Standard) This document provides specific requirements for test organisms, suspensions, inoculated carriers, biological indicators, and test methods intended for use in assessing the performance of sterilization processes employing dry heat as the sterilizing agent at sterilizing temperatures within the range of 120°C to 180°C. Contact: [Tommy Kim](#)

AAMI/ISO 11138-5, Sterilization of health care products-Biological indicators-Part 5: Biological indicators for low-temperature steam and formaldehyde sterilization processes. (reaffirmation of an American National Standard) This document Specifies requirements for test organisms, suspensions, inoculated carriers, biological indicators and test methods intended for use in assessing the performance of sterilization processes employing low-temperature steam and formaldehyde as the sterilizing agent. AAMI ST58:202X, Chemical sterilization and high-level disinfection in health care facilities. (revision of an American National Standard) This standard provides guidelines for the selection and use of liquid chemical sterilants (LCSs)/high-level disinfectants (HLDs) and gaseous chemical sterilizers that have been cleared for marketing by the U.S. Food and Drug Administration (FDA) for use in hospitals and other health care facilities. These guidelines are intended to assist health care personnel in the safe and effective use of gaseous chemical sterilizing systems, LCSs/HLDs, and associated equipment. Contact: [Tommy Kim](#)

AAMI/ISO 17665:202X, Sterilization of health care products — Moist heat — Requirements for the development, validation and routine control of a sterilization process for medical devices. (proposed identical national adoption of ISO 17665:202X, Ed. 2) This second edition cancels and replaces the first edition of ISO 17665-1:2006, ISO/TS 17665-2:2009 and ISO/TS 17665-3:2013, which have been technically revised. This standard provides requirements for the development, validation, and routine control of moist heat sterilization processes for medical devices. It also contains guidance which is intended to explain the requirements set forth in the normative sections. The guidance given is intended to promote good practice related to moist heat sterilization processes according to this document. The application within industrial and health care settings is considered. Contact: [Mike Miskell](#)

AAMI/ISO 81060-3:202X/Ed.1, Non-invasive sphygmomanometers — Part 3: Clinical investigation of continuous automated measurement type. (proposed identical national adoption of ISO 81060-3:2022) This document specifies the requirements and methods for the clinical investigation of continuous

automated non-invasive sphygmomanometers used for the measurement of the blood pressure of a patient. This document covers both trending continuous automated noninvasive sphygmomanometers and absolute accuracy continuous automated non-invasive sphygmomanometers and focuses solely on requirements for the clinical investigation. This document does not cover usability aspects such as the form and manner of the data display or output and does not specify a numerical threshold on the minimum output period. New Work

Consensus Body Members Needed

The committees listed below are seeking new members in the indicated stakeholder interest category to participate in the development of their documents. Definitions of the various stakeholder groups are:

Industry: *A member of a consensus body who, as an individual or organizational representative, is involved in the commercial production, promotion, sale, use or distribution of materials, products, systems, or services covered in the scope of technical documents developed by AAMI shall be classified as an Industry Interest stakeholder. Individuals in this interest category include manufacturers, those involved in supply chains, employees of test labs or commercial labs, industry consultants, etc.*

User: *A member of a consensus body who, as an individual or organizational representative, purchases, utilizes or receives the materials, products, systems, or services covered in the scope of technical documents developed by AAMI in the delivery of healthcare shall be classified as a User Interest stakeholder. Individuals in this interest category include clinicians, employees or representatives of Healthcare Delivery Organizations, clinical consultants, patients, etc.*

Regulatory: *A member of a consensus body who, as an individual or organizational representative, is involved in the regulation of the materials, products, systems, or services covered in the scope of the technical documents developed by AAMI shall be classified as a Regulatory Interest stakeholder. Individuals in this interest category would include those representing federal, state, local, foreign, or other government entities.*

General interest: *A member of a consensus body who, as an individual or organizational representative, has a general direct and material interest in the materials, products, systems, or services covered in the scope of the technical documents developed by AAMI and who does not fit into any of the preceding categories shall be classified as a General Interest stakeholder. Individuals in this category would include noncommercial academicians, noncommercial researchers, patient or consumer advocates, representatives of accrediting organizations, representatives of other organizations, etc.*

Other Interest: *A member who does not fit into any of the preceding interest categories but who still has an identifiable material interest in, or specialized knowledge of the materials, products, systems, or*
