Comments due 13 May 2024

AAMI EQ56, Standard for a medical equipment management program (proposed new American National Standard). This document specifies minimum requirements for a management program designed to minimize risks associated with medical equipment that is used during the care of patients in a healthcare delivery organization. This document addresses the structure of the program, documentation requirements, staffing, resources, relationship/client management, service continuity and availability, change management, and quality management associated with the management of medical equipment. Contact: [Mike Miskell](#)

AAMI EQ103, Alternate equipment management (AEM) in healthcare facilities (proposed new American National Standard). This document provides a framework for the development and ongoing management of an AEM program. It assists healthcare delivery organizations (HDOs) seeking to meet the related Conditions of Participation set by the Centers for Medicare and Medicaid Services (CMS). By

incorporating a quantitative, scientific, and risk-based methodology, along with input from clinical staff, this document establishes minimum requirements for AEM programs. For devices included in an AEM program, this document provides requirements for procedures that assure acceptable levels of safety and performance are maintained. Contact: [Mike Miskell](#)
